What aspect have you selected?	What was the previous level (2 years ago)?		What is the current level?	
	Quantity	Units	Quantity	Units
Air Emissions/Emissions of Toxics (CLO ₂)	109.5	lbs/year CLO ₂	4.3	lbs/year CLO ₂
<p>i. How is the current level an improvement over the previous level?</p> <p>Increased Chlorine Dioxide emission reduction at the Bleach Plant through operational improvements with the Packed-Bed Scrubber System.</p> <p>ii. How did you achieve this improvement?</p> <p>Conducted an engineering improvement study by Corporate Technology. Designed and installed a new weak wash/white liquor sweetening system for the Bleach Plant Scrubber system. Achieved a 96.5% reduction in Chlorine Dioxide emissions to the atmosphere.</p>

- 2 Select at least four environmental aspects (no more than two from any one category) from the Environmental Performance Table in the instructions and then tell us about your future commitments. If you need more space than is provided, attach copies of this page.

Note to small facilities: If you are a small facility, you need to make commitments for at least two environmental aspects in two different categories.

First aspect you've selected

- a. What is the aspect? Waste/Total Solid Waste - Landfilled
- b. Is this aspect identified as significant in your EMS? ☒ Yes ☐ No
- c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.
- ☒ Option A:
Absolute value 48,000 cu. yds/year
(Quantity/Units)
- ☐ Option B:
In terms of
units of production (Quantity/Units)
or output

d. What is the level you are committing to achieve over the next three years? You may choose to state this as an absolute level or in terms of units of production or output.

- ☒ Option A:
Absolute value 42,000 cu. yds/year
(Quantity/Units)
- ☐ Option B:
In terms of
units of production (Quantity/Units)
or output

e. How will you achieve this improvement?

Land application/beneficial use of waster fiber, boiler ash and other solid waste materials. This will allow a decrease/minimization of additional cubic yards of solid waste to the active landfill cells, thus prolonging valuable landfill space.

Second aspect you've selected

a. What is the aspect?

Discharges to Water /COD Discharges to Water (Soda Loss)

b. Is this aspect identified as significant in your EMS?

☒ Yes ☐ No

c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.

e. How will you achieve this improvement?

The objective is to reduce the amount of soda (excluding lime) that is discharged to the mill sewer system. This will improve the operations and organic removal efficiency of the aerobic wastewater treatment system. This objective will be achieved through monitoring sewer soda content, management/process operator communication, and process and operating proficience optimization.

* This differs from aspect four in that this item captures all soda losses, plant wide into the wastewater. The aspect below focuses on solid lime losses within the caustic plant only.
